ExSite 3.8 Features

The following outlines new features and modules for the Exware Content Management System. Not all features and modules will be applicable for all client sites. If you have questions about this announcement or how your site can incorporate these new features, please call or email us.

HIGHLIGHTS

Email Distribution (upgrade)
Our Email Distribution module now includes a sent log that shows sent, opened, bounced and unsubscribed emails. And as always, this data can be exported to Excel.

Photo Albums (upgrade)
You can now crop your images in the Photo Albums module.

e-Zine (upgrade)
Introducing a new dynamic article slider that allows you to promote feature articles.

Billing Adjustments (new)
This is a new module for configuring surcharges and adjustments, including coupon codes, taxes & shipping charges.

Payments (upgrade)
We've added shortcut buttons for common reports, and you can now email invoices/receipts directly to your members/clients.

Membership (upgrade)
The Email Digest format can now be customized for your organization. Ask us what options are available.

Functionality & Technology (advanced users)

- You can now easily move documents between libraries
- A new Date Picker tool has been introduced to most of the backend date selection fields
- We've added more password security options and more features to block invalid URLs
- Also added was a master website selector, which lets you select a "default" site

For more information on these items, please see our support site at <http://support.exware.com>.

Email Notifications
E-mails are the messages themselves, along with any attachments. To resend a previously sent email, reset it.
Recipient Groups are sets of your website members to whom an email can be sent.
Uploaded Email Lists are e-mails that you have imported through Excel or a tab-delimited text file.
